SUMMARY

A creative, energetic and result oriented individual with key interest in the development of systems and software, for global connectivity and to optimize processes, enhance productivity and manage costs. My skill set includes proficiency in web app development, graphics designing, Microsoft office, and general computer operations and system maintenance. I am open to learning.

My personal values which include innovation, smart work, integrity, and team work will be aligned to your business culture to increase profitability. I have Leadership, Organizational, and Planning skills which serves as potentials to enhance communication and effective work ethics.

SKILLS AND FUNCTIONAL EXPERIENCE

TECHNICAL SKILLS ≫

- Worked as a systems administrator at St. Peters (Ang) Church; during which a management system (Fx-kip) was developed and deployed for an effective running of the church. This was completed in due time and obtained client satisfaction.
- As a freelancer, I designed a web application (sunesismobile) for a small-scale business, to help manage and efficiently handle customers orders and payments.
- Designed a project performance prediction system, based on SIWES experience for schools as my undergraduate research project; having undergone basic training in app development using Php, MySQL, Html and CSS, for fishing out scores that are inconsistent.
- Lead graphics designer at Rock Media, Grace Place Media both of which is an I.T department of the church where I worship.
- Designed fliers and banners and campaign website for John Pofi foundation and John Pofi Campaign organization during my time as a serving corps member at the John Pofi Foundation, which was my place of primary assignment.

INTERPERSONAL SKILLS ≫

- Served as the president in my community development service (CDS) group during which programs such as skills acquisition, corps members/student seminars, that foster personal and community development was embarked on, and produced effective results.
- Organized seminars and workshops for youths in Ajegunle area of Lagos state, under the umbrella of **"INDEPENDENCE SUMMIT".** this became an annual program held on

every first Sunday in October, which created an avenue for young people to come together and share ideas on how to become better citizens.

- Innovation and creativity skills among fellow team members was employed in organizing Leadership, Academic and Skill development lectures for Secondary School Students under the umbrella of **"PROJECT UNRAVEL"** in Ajegunle area of Lagos State.
- Created an avenue for young people to learn new skills as related to computer systems, in association with the training organized by **"ROCK MEDIA OF ST. PETERS (ANG) CHURCH, OLODI".**

EDUCATION AND QUALIFICATION

B.Sc. Computer Science »
Bachelor of Science, Second Class Honours (Upper Division)
University of Nigeria, Nsukka
2017

- Successfully completed my research project on the design and implementation of a project performance prediction system, based on SIWES experience.
- Organized tutorials in Physics and Mathematics for year one and two students at my final year as well as other numerous departmental tutorials. This gave me opportunity to always study to gain broad knowledge of those courses so as to deliver appropriately.
